kids in our community ~~will~~ ^{did}
lose their seats in Head Start
classrooms this Fall

The WV Head Start Association Executive Director will speak of the impact the sequester has had on the State of WV - losing 382 children, job loss, and forced cuts of essential programming; and the leadership of the NPHS Board of Directors will be available for comment.

Hear first-hand from parents the impact Head Start has made in their child's early learning experience to gain an understanding of the impact that not having this early childhood program available for all eligible children is a detriment to the local community and so many families.
